Workshop

Energy, Environment and Green Finance for Sustainable Development

15th October 2020

Peking University HSBC Business School (PHBS)
Chinese Economics Association (UK) CEA (UK)

at

The UK Campus of PHBS, Oxfordshire OX1 5HR
(Online)

Call for Papers and Participants

Climate change and sustainable development are one of the world’s most pressing challenges. In November 2021, UN Global Climate Summit will be held in Glasgow, making a global commitment to reduce carbon emission over next decades and beyond. Rising CO2 emissions have clearly negative environmental consequences. Currently, the world emits around 36 billion tonnes of CO2, and 34 billion tonnes are from fossil energy consumption of oil, gas and coal, accounting 94% of the world emission. For energy spent on supply of electricity and heat alone, it produces 49% of the world emission. Energy is a key phenomenon affecting our environment decisively along with China as the largest emitter in the world, emitting more than 27% of global emissions, compared with 18% of the US. Studies on energy, or China, in relation to emission, environment and green finance are valuable for enhancement of our understanding on how to make the world more sustainable. Particularly, knowledge learnt from academic research will be very meaningful in support of the 2021 UN Global Climate Summit in the UK.

To intensify our endeavours in promoting international exchange of research related to the theme of the conference as part of support to the Global Climate Summit in the UK, both academics including doctoral students, business consultants and policy makers are invited to attend the Conference for exchanges and network. Particularly, the latest research papers related to the theme are invited for presenting to the conference with an opportunity of submitting the papers to the special issue of JCEBS.

Topics of papers include, but not limited to:

- Demand and supply of fossil energy and its related policy or regulatory evaluation or study;
• Energy market and prices, and energy trade;
• Electricity market reforms;
• Smart management for electricity consumption;
• Development of renewable or low carbon energy technology, and issues in its investment;
• Energy trading and finance;
• Carbon emission trade;
• Benefits of green finance under different institutional and environmental contexts;
• Policies and role of governments in promoting green finance;
• Low carbon finance;
• Alternative transportation fuels.

Submission of Papers to present to the workshop

Workshop submission (Extended Abstract or Full Paper) shall be made by 15th September 2020. For papers submitted, the authors are invited to consider publication of their papers by marking ‘Submission to Special Issue of JCEBS’ for further referee assessment of the paper to be suitable for publication. The guest editors will respond to your intention respectively by sending you author instructions for the special issue of JCEBS.

Submission Email: ceagreen691@gmail.com, and the authors will be notified by 30th September 2020.

Register Attendance

To register your attendance, you shall send your information of NAME, AFFILIATION, CONTACT PHONE NUMBER, and POSITION via email to ceagreen691@gmail.com.

Journal of Chinese Economic and Business Studies

Started in 2003, as a publish open access, Journal of Chinese Economic and Business Studies is a peer-reviewed journal, published 4-issues a year by Taylor & Francis (Routledge), and managed by editor-in-chief Professor Fu Xiao Lan (Oxford University). The Journal aims to publish current and relevant findings from cutting edge research in Chinese economic, business and related issues. More specifically, it aims: to provide a forum for exchange of information and ideas among people in academic, business and government professions who are interested in the Chinese economy and business studies; to foster and enhance research activities that advance knowledge in transition and emerging economies; to discuss the relevance of Chinese economic and business studies to our society. The journal specialises in both theoretical and empirical research on the Chinese economy, business and related issues including economic theories and policies for transition economies, economic reforms in the agricultural sector, state-owned enterprises, financial and fiscal systems and management styles, R&D and technology, marketing, human resources, business strategy, business culture and ethics, foreign
trade and direct investment, energy and environment, and similar issues for Hong Kong and Taiwan, and their relevance to other parts of the world.

The Organizers

The Executive Committee of the Conference and Guest Editors on Special Issues of Journal:

Dr. Jiafu An, University of Portsmouth (Guest Editor for JCEBS)
Dr. Chi Keung Marco Lau, University of Huddersfield (Guest Editor for JCEBS)
Dr. Yukun Shi, University of Glasgow (Guest Editor for JCEBS)
Dr. Bing Xu, Heriot-Watt University (Coordinator and Guest Editor for JCEBS)

Dr Carryn Yong, Peking University (General Secretory of Conference)
Professor Guy Liu, Peking University (Conference Chair)

Conference Scientific Committee

Dr. Jiafu An, University of Portsmouth
Professor Jiandong Chen, Southwestern University of Finance and Economics
Dr. Yizhe Dong, University of Edinburgh
Professor Wenxuan Hou, University of Edinburgh Business School, Shanghai Lixin University of Accounting and Finance & CEA 30th President
Dr. Chi Keung Marco Lau, University of Huddersfield
Dr. Xi Liang, University of Edinburgh
Professor Guy Liu, Peking University HSBC Business School Oxford Campus, CEA co-founder and former president, Conference Committee Chair
Dr Yue (Lucy) Liu, University of Edinburgh
Xianda Liu, University of Edinburgh Business School
Dr. Yukun Shi, University of Glasgow
Professor Ping Wei, Central South University
Dr. Bing Xu, Heriot-Watt University
Professor Jin Xuan, Loughborough University
Professor Yun Zhang, Shanghai Lixin University of Accounting and Finance
